

Seanergy 2019 will gather professionals of Marine Renewable Energies, offshore wind and energy storage, on June 5th to 7th in Dunkirk, France

Dunkirk, France, February 19th 2019 - [Seanergy](#), international forum promoting marine renewable energies (MRE) and offshore wind, will held its 4th edition from 5th to 7th June 2019 in Dunkirk, France. This territory, already fully involved in the energy transition, will thus be the world capital of MRE for a few days. June 5th and 6th will be dedicated to the exhibition, conferences, BtoB meetings... June 7th will propose to professionals to visit MRE industrial sites and offshore installations.

Seanergy aims at promoting the marine energy sector - fixed and floating wind turbines, tidal, floating solar, wave energy, marine thermal energy - and to reinforce synergies between all the actors, in order to accelerate its structuring and promote its development, on a worldwide level.

By stimulating collaboration between companies, manufacturers, researchers, development centers and students, in France and around the world, Seanergy has an ambition: making MRE the energies of tomorrow, to help the energy transition!

Marc Lafosse, Oceanographer, CEO of Bluesign

Organized by Bluesign, **Seanergy** is the annual professional meeting dedicated to MRE, bringing together actors and experts from all over the world: politics, energy and industrial manufacturers, technology experts, start-ups, researchers, investors.... **It will be organized on June 5th and 6th around:**

- an **exhibition area** with **250 MRE French and international actors**, with, for the first time this year, an area dedicated to energy storage companies
- **industrial and technical conferences**, to cover topics that drive the sector, such as energy storage, maritime rights, industrialization, with a focus on floating wind and maintenance
- **business meetings** all over 2 days
- **itches and workshops** on specific topics linked with MRE
- special moments of **networking**

Seanergy will also propose, on **June 7th**, **technical visits** to emblematic **industrial sites** and offshore installations of the Hauts-de-France territory.

Program and registrations to come on www.seanergy2019.com

The 6th National Marine Renewable Energy Conference, organized by the French Renewable Energy industries Association ([SER](#)), will be held on Tuesday, June 4th in the afternoon, as a pre-opening event to Seanergy 2019. It will be addressing the MRE development with a global and political perspective, around various roundtables.

About [Seanergy](#)

International forum dedicated to the Marine Renewable Energy - #Seanergy2019

After joining forces with ICOE (International Conferences on Ocean Energy) in 2018 in Cherbourg, Seanergy will gather in Dunkerque, from June 5th to 7th, 2019, the key actors of the Marine Renewable Energy and Offshore Wind fields – politics, ordering institutions (energy operators and industrials), technological experts, NGOs, researchers, investors and subcontractors. This edition will bring together more than 4 000 participants around an exhibition area of 250 exhibitors, conferences, BtoB meetings and industrial sites' visits with the goals of reinforcing synergies between all the actors of this industry, accelerating its structuration and promoting its development, in France and worldwide.
