

## Press invitation

With the European Climate Energy Plan and the call for tenders for the future Dunkirk offshore wind farm, marine energies are on top of the news!

To meet with French and international players of Marine Renewable Energy (MRE) and offshore wind, Bluesign invites you to the 4<sup>th</sup> edition of SEANERGY, from June 5<sup>th</sup> to 7<sup>th</sup> in Dunkirk, North of France.

► **Wednesday 5 and Thursday 6 June: Exhibition & Conferences**

- ✓ An exhibition area bringing together more than 200 French and international exhibitors;
- ✓ 4 plenary conferences to address key issues in the sector such as maritime law, floating wind, maintenance, and for the first time, energy storage;
- ✓ Various professional meetings over the 2 days: more than 500 business meetings, pitches, technical workshops, special networking moments.

► **Friday, June 7: Immersive technical visits**

Visit, on prior registration and depending on the places available, two industrial sites emblematic of marine energy in the region of Dunkirk: Damen Shipyards and Dillinger steel plate production site.

The **6<sup>th</sup> National Marine Renewable Energy Conference**, organized by the French Renewable Energy industries Association ([SER](#)), will be held on Tuesday, June 4<sup>th</sup> in the afternoon, as a pre-opening event to Seanergy 2019. It will be addressing the MRE development with a global and political perspective, around various roundtables.

**Seanergy 2019 is a professional event – Press accreditation is mandatory**
